Agenda

- Where are we now?
- What's going to change?
 - New admin experience
 - New developer experience
- Next steps: now it's your turn!

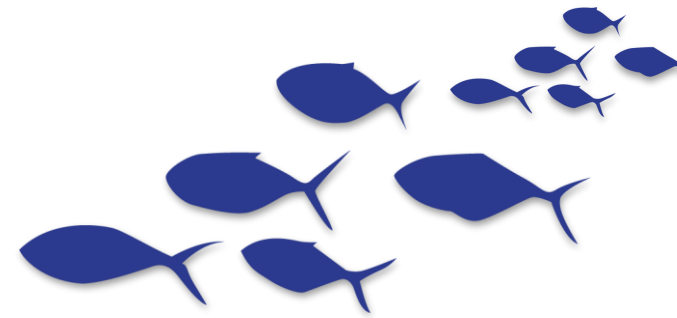

Where are we **now**?

- **LCS**
- **Development**
 - Cloud-hosted environments
 - VHD
- **ALM**
 - Heavy TFVC usage
 - Pipelines: build and partial release automation.

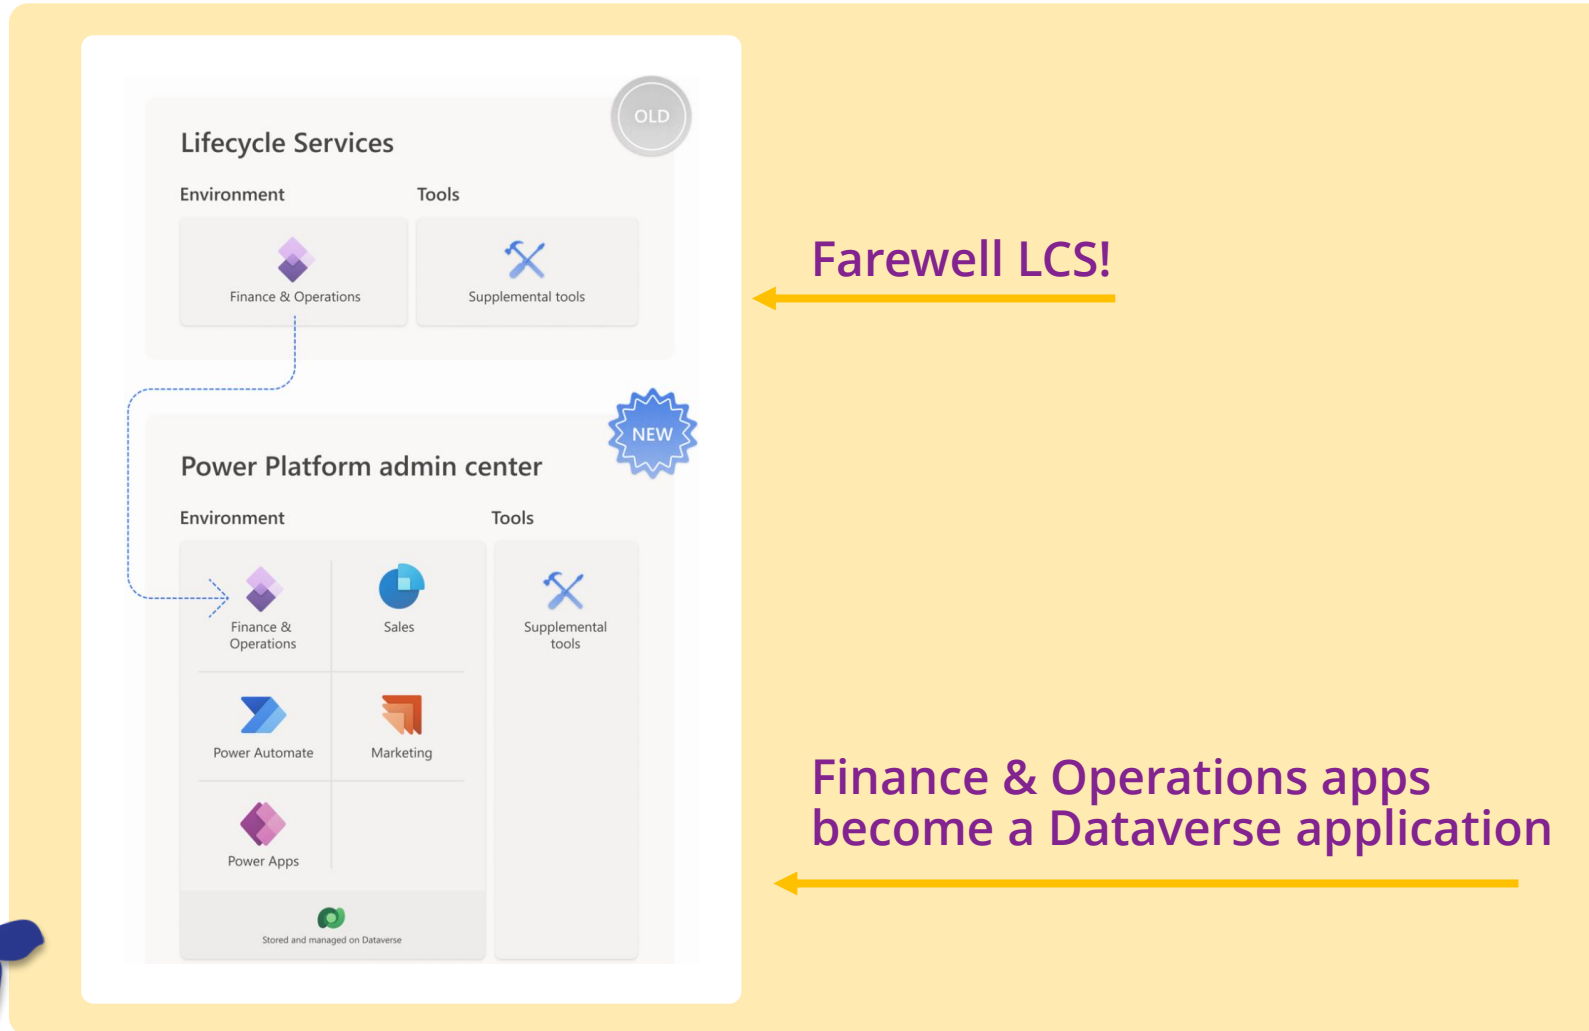

What is going to change?

UNIFIED ADMIN EXPERIENCE

Unified admin experience

Farewell LCS!

Finance & Operations apps
become a Dataverse application

Transition to **capacity-based model**

- **Default capacity:** 60GB of F&O database
 - + 10GB Dataverse capacity
- **Additional users:** 4 GB F&O database / additional user
 - + 250MB Dataverse capacity / additional user
- **At tenant level:** the hunger games for Dataverse capacity begin!

*I don't know much
about licensing!*

Environment management

- PPAC
- Power Platform CLI
- **PowerShell:** Microsoft.PowerApps.Administration.PowerShell

- Environment creation
- Copy environments
- ***Create a service principal!!***

Unified admin EXPERIENCE

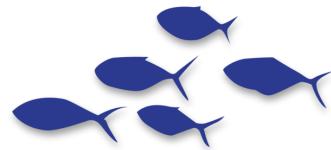

Demo!

Demo!!!

What is going to change?

Unified developer experience

Unified **developer experience**

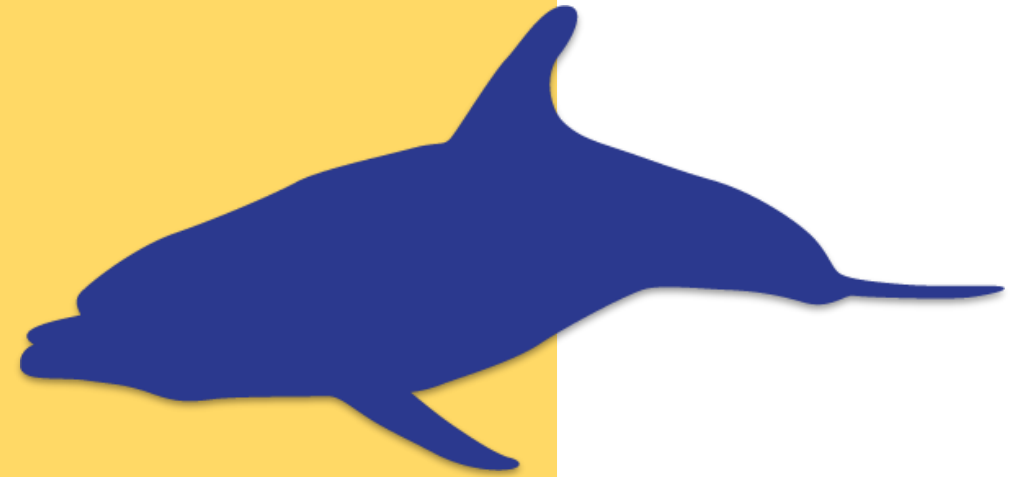

- *“Local”* development
- Git is easier now
- CHE & VHD?
- Pipelines
 - Prod
 - Pac cli or PowerShell

“Local” development

- It's been a long way
- Visual Studio on your PC
 - PackagesLocalDirectory
 - F&O VS extension
 - LocalDB for Xref
- Needs a Dataverse environment with the developer tools

Unified developer experience

Demo!

Demo!!!

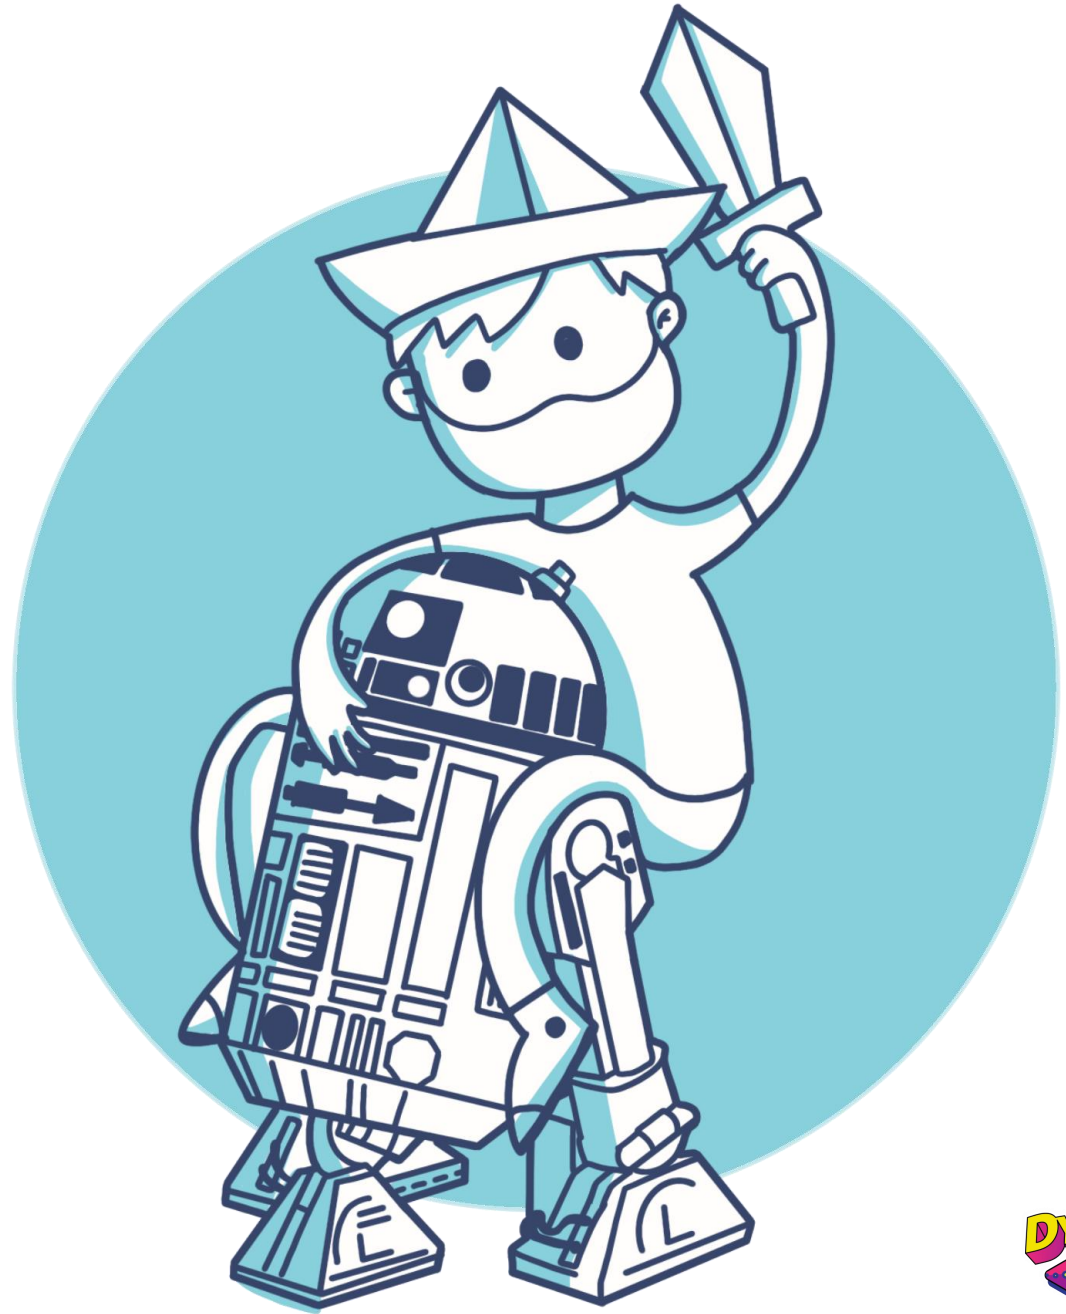

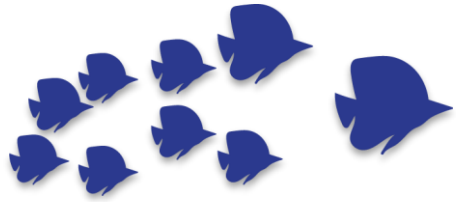

Next steps

- Get hands-on with PPAC
- Review your LCS environments
- Get someone from your team to try all of this!
- Join the Yammer feedback groups:

Thanks for coming!

Time for questions...

But not about licensing please 🚫
